Abstract (en)
[origin: EP2484995A1] A heat source side unit and a refrigeration air-conditioning apparatus capable of effective use of a tank or the like and efficient recovery or the like are provided. In a heat source side unit 100 which has a compressor 101 and a heat source side heat exchanger 104 and forms a refrigerant cycle by connecting a load side expansion device 202 and a load side heat exchanger 201 by a pipeline, an oil tank 110 which feeds refrigerator oil whose amount has become insufficient by washing of the refrigerant cycle to the compressor 101 for replenishment is further provided in the refrigerant cycle.
