Abstract (en)
The invention relates to a method for controlling energy delivery from a utility within a system comprising at least a meter at a consumer's house, said meter being adapted to authorize energy delivery, said method being characterized in that it comprises the successive steps of: i) authorizing (10) automatically at the meter energy delivery to said consumer during a first predetermined time period (T 1) and measuring and storing (20) at the meter amounts of energy which have been delivered to said consumer during said first predetermined time period (T 1); ii) generating at the end of said first predetermined time period (T 1) a payment request signal corresponding to consumed amounts of energy; iii) checking (50) the reception of an information that payment has been performed; iv) stopping (60, 70) automatically at the meter the delivery of energy if said information has not been received within a second predetermined time period (T 2) starting on or following step ii).
