Abstract (en)

[origin: WO2011042014A1] The invention relates to a device for the electrostimulation therapy of the human body, comprising several electrodes (1) that contact the body surface and apparatuses (3-5) for applying voltage to the electrodes (1). According to the invention, the electrodes are arranged in a line and said apparatuses are provided to apply voltage to the electrodes (1) consecutively along the line.
