Abstract (en)

[origin: WO2011042277A1] The invention relates to a system, having at least one press unit of a printing press and at least one transport carriage, wherein the at least one transport carriage is arranged so as to feed at least one printing forme to the at least one press unit or to discharge said at least one printing forme from there. At least one coupling device is provided, by way of which the relevant transport carriage is coupled, or at least can be coupled, releasably to the relevant press unit in the operating state of said transport carriage, in which it is arranged at said press unit.
