Abstract (en)

[origin: WO2011042314A1] The invention relates to a water-conducting domestic appliance (1), in particular a dishwasher or washing machine, which has at least one, in particular flexible, water line (2) for supplying or draining water. The water line (2) can be connected to an external and/or appliance-side connection unit (3) provided with an external thread and can be retained thereon via a joining unit (4; 4a) by means of a threaded body (5) that can be secured on the thread of the connection unit (3). The appliance is designed so that the tightening torque of the threaded body (5) is limited.
