Abstract (en)

[origin: WO2011051086A2] The multi-point lock (1) with translating bolt (2) comprises a rotatable distributor (3) equipped with means (4) for converting its own rotatory movement into a first reversible translation of the bolt (2) from a retracted position to a position of extraction from the case (5) of the lock (1), and into a second reversible translation of a drive lever (6) for the latch (7) of the lock (1).
