Abstract (en)

[origin: WO2011043742A1] The subject of invention is a telescopic pole for joint opening of casements in double windows, which enables, that with the help of a handle in the inner casement we can at the same time open or close also the exterior casement, when both casements have standard closing mechanisms installed. The telescopic pole for joint opening of casements in double windows is composed of segments (1a, 1b, 1c), which are telescopically foldable one into another, where the initial segment (1a) and the final segment (1 c) have corks (3a, 3b) installed through swivel elements (2a, 2b) and the segment (1c) has a closing cork (4), and on the attaching holder (6) there is a pointer (6).
