Abstract (en)
[origin: WO2011042311A2] The invention relates to a refrigeration device, in particular a domestic refrigeration device, comprising a chamber (26; 27), at least one ventilator (1) and a support (2) mounted in the at least one chamber (26; 27) and being embodied to receive the ventilator (1) in two different positions. A contact element (10) which is electrically connected to the ventilator (1) can only be mounted in the first mounting point (16) of the support (2) when the ventilator is in the first position and only in the second mounting point (16) of the support (2) when the ventilator (1) is in the second position.
