Abstract (en)

[origin: EP2486819A1] A description is provided for a device for articles that conventionally hang over the shoulder, such as satchels, handbags, luggage, inter alia, which include straps, handles, chains or similar means. The device prevents said articles from slipping and falling from the user's shoulder and comprises a rear section (20) in contact with the user's back; a first fastening device (30) mounted in the rear section (20) and on which said hanging means (2) are secured; a mid-section (40) attached to the rear section (20) and extending forwards from the latter, the mid-section (40) being in contact with the user's shoulder; a front section (50) attached to the mid-section (40) and extending forwards from the latter; the mid-section being in contact with the user's chest; and, a second fastening device (60) mounted in the front section (50) and on which said hanging means (2) are also secured.
