Abstract (en)
[origin: EP2487013A1] The device (1) has a feed channel (2) supplying a food product mass to a portioning section (4). The channel has first and second portions with respective cross-sections arranged one behind the other. The second portion includes a small passage area arranged relative to the first portion in a direction of flow. The first portion abruptly changes into the second portion, which abruptly ends in a passage area extension or changes into a third portion in the passage area extension. Metal sheets (42, 44) are movable relative to the channel. An independent claim is also included for a filling machine comprising a cutting device with a knife.
