Abstract (en)

[origin: EP2487345A2] An actuator (30) actuates directional control valve (20) having tank connections (TR,TS) for connection to tank (40), pump connection (PD,PS) for connection to pump (42) and working port (D). The actuator and/or directional control valve is biased in a switching position (B). The directional control valve is displaced into switching position (A) by actuator and is held by fluidic self-holding unit (50). An independent claim is included for method for driving valve assembly.
