Abstract (en)
The short-stroke tactile switch comprises a tactile pressure point noticeable for the operator, a sensing element (10), and two redundantly arranged tactile micro-switch and a non-tactile micro-switch. The micro-switches are operated by the sensing element. The sensing element is comprised of a ball guide (60) and a support surface (40) so that the maximum stroke movement of the sensing element for operating the micro-switch is limited.

Abstract (de)
Die Erfindung betrifft einen Kurzhubtaster bestehend aus einem Tastkörper zur Betätigung des Kurzhubtasters, wobei wenigstens zwei redundant angeordnete Mikroschalter vorgesehen sind, die über den Tastkörper betätigbar sind, und wobei der Kurzhubtaster nur einen taktilen Druckpunkt aufweist.
