Abstract (en)
[origin: WO2011045362A1] The invention relates to a sliding arrangement, in particular an ejector device for drawers, sliding doors, hinged doors, etc., having an ejector arrangement with a slider (21) which can be adjusted by means of a spring element (22) between an inserted position and an ejected position. In order to allow the user-friendly opening of the drawer, the invention provides that the slider can be adjusted in a spring-loaded manner on a first adjustment path, and on a following, second adjustment path can be adjusted, without spring-loading, over a free-running extent of the ejector device.
