Abstract (en)  
[origin: WO2011045158A2] The invention relates to a household appliance (HG), in particular a household dishwashing machine, at least having an operating indicator (BA) having at least one visual and/or acoustic indicator means (AZ), which is designed at least to display and/or signal a completed treatment process. According to the invention, the household appliance (HG) can be activated and deactivated by an actuatable switching means, wherein an activation signal actuating the switching means can be generated by an on switch (ES) in order to activate the household appliance (HG) and wherein the household appliance (HG) has a control device (SE) by means of which a deactivation signal (Saus) actuating the switching means can be generated upon a completed treatment process in order to deactivate at least the display means (AZ).
