Abstract (en)

[origin: WO2011045160A1] The invention relates to a household appliance (HG), in particular a household dishwashing machine, at least having an operating indicator (BA) having at least one visual and/or acoustic indicator means (AZ), which is designed at least to display and/or signal a completion of a treatment process. According to the invention, the indicator means (AZ) indicating and/or signaling at least the completion of the treatment process is activated for a predetermined period of time (?t) after completion of the treatment process.
