Abstract (en)

[origin: WO2011079920A2] The invention relates to a method for producing a particle-based element (13, 22, 29, 34), especially a chipboard or fiberboard. A first three-dimensionally shaped structural element (1, 14, 15, 23) having first particles is produced. A second structural element (8, 17, 26) having second particles is shaped so as to be complementary. The first structural element (1, 14, 15, 23) is connected to the second structural element (8, 17, 26).
