Abstract (en)

[origin: WO2011045319A1] The invention relates to a process for producing prefabricated compound tower-segment units (20) for a tower of a wind plant. A formwork (10) is supplied, and the formwork is filled with concrete. A low-viscosity material is applied, in the form of a compensation layer, to a flange of the prefabricated compound unit (20).
