Abstract (en)

[origin: WO2011044987A1] The invention relates to a method for actuating at least one digital printing unit (111, 112, 113, 114) of a digital printing press (100), comprising at least one driven transport device (110, 115) and an associated movement control device (150), wherein the at least one digital printing unit (111, 112, 113, 114) is connected to the movement control device (150) via a data connection (151). According to the invention, values of variables characterizing the transport are transmitted digitally from the movement control device (150) via the data connection (151) to the at least one digital printing unit (111, 112, 113, 114), so as to be used for controlling the printing process in the at least one digital printing unit (111, 112, 113, 114). The invention further relates to a corresponding digital printing press (100).
