Abstract (en)

[origin: WO2011044954A1] The present invention relates to a fuel dispensing unit (1 ) for refuelling vehicles, comprising a base module (2) comprising a housing having a front side (10), a rear side (12) and end sides (11, 13) connecting said front and rear sides (10, 12), said housing being enclosed by wall sections. At least a first of said wall sections forms a first door (20), wherein said first door (20) is extending along at least a portion of the front side (10) or the rear side (12) and at least a first portion of one of the end sides (11, 13), said first door (20) being pivotable towards a second portion of said one of the end sides.
