Abstract (en)

[origin: WO2011045517A2] The invention relates to a method for producing a sheet of glass including antimony oxide, said method including a step of melting a batch, a step of transporting the molten glass to at least one forming device, and a forming step, in which glass frit including a gravimetric concentration of antimony oxide of 2% to 30% is consecutively or alternately added to said batch, during said melting step, or during said step of transporting the molten glass to at least one forming device.
