Abstract (en)
[origin: WO2011045369A1] The invention relates to a volume accumulator (15), comprising a guide housing (33) and a separating element (34), wherein the separating element (34) is slidably mounted on an inner lateral face of the guide housing (33). According to the invention, at least one indentation (41) is designed on the guide housing (33), said indentation protruding into the guide housing (33), wherein in the direction of the separating element (34) the indentation (41) has an open end that serves as a stop for the separating element (34).
