Abstract (en)

[origin: WO2011045503A1] The invention relates to a fuel injection device for an annular combustion chamber of a turbine engine, said fuel injection device including: a pilot circuit feeding an injector; multipoint circuit feeding injection openings (80), formed in a frontal surface (72) of an annular crown (74), said crown being mounted in an annular chamber (78); and a means for heat-insulating said frontal surface (72), said heat insulation means including an annular cavity (70) formed around injection openings between the front surface (72) of the annular crown and a frontal wall (76) of the annular chamber (78), said annular cavity being intended to be operationally filled with air or cokefied fuel.
