Abstract (en)
[origin: WO2011045507A1] The invention relates to an air-conditioning device, in particular for a motor vehicle, comprising at least one liquid collection tank (1) including a liquid inlet (11) and a lower liquid outlet (12), said tank being provided with means for automatically sealing the inlet (11) when the level of liquid in the tank (1) is above a pre-determined level.
