Abstract (en)  
[origin: WO2011045111A1] The invention relates to a magnet carrier (1) for a pole housing (10) for fastening magnets (111, 112) to a pole housing wall (101), wherein the magnet carrier (1) can be arranged between at least two magnets. The magnet carrier (1) comprises a positioning element (12, 22, 32, 42, 52) and a securing element (13, 23, 33, 43, 53). The positioning element (12, 22, 32, 42, 52) can be arranged on the pole housing wall (101). Furthermore, the positioning element (12, 22, 32, 42, 52) is designed to fix the at least two magnets (111, 112). The securing element (13, 23, 33, 43, 53) can be arranged on the pole housing wall (101) with the pole housing wall opposite of the positioning element (12, 22, 32, 42, 52). The securing element (13, 23, 33, 43, 53) is designed to be in engagement with the positioning element (12, 22, 32, 42, 52) and to thereby hold the positioning element (12, 22, 32, 42, 52) on the pole housing wall (101).
