Abstract (en)
[origin: EP2489617A2] The apparatus (100) has alignment elements (116,118) which are provided on the bearing region where sheet media is supported. The sensors (120,122,124,126) are provided for detecting sheet media in detection area. The drive unit is provided for moving the alignment element (118) for aligning sheet media in response to the detected result of the sensor.
