Abstract (en)

[origin: EP2489626A1] The truck (1) has an electrical energy storing device (30) arranged in rear-columns (3a, 3b) of a driver's overhead guard (3) in a lower region at a rear-side of a vehicle seat (5). A part of a longitudinal extension is arranged along a vehicle longitudinal direction directly in the rear-columns in response to a vehicle longitudinal direction between the rear-columns of the driver's overhead guard. The electrical energy storing device is arranged at a support structure (50) i.e. driver's protective roof rear wall, for connecting vertical columns with each other.
