Abstract (en)

[origin: EP2489791A2] The inspection unit (100) has a connector portion (10) which is inserted into protection element. A supporting portion (30) is provided in the protection element. The tubular portions of protection element are overlapped with supporting portion. A cover (31) is provided for covering the test tubes (41-44). The upper end of test tube is provided with threaded connection, while lower end of test tube is inserted into connection bores.
