Abstract (en)
[origin: WO2011047943A2] The invention relates to cosmetic products containing, in a cosmetic carrier, a combination of (a) at least one polyamide that is a reaction product of at least one dimerised fatty acid and at least one diamino compound, and (b) at least one copolymer comprising at least one structural unit of formula (b-i) and at least one structural unit of formula (b-ii) wherein R is a linear or branched (C4 to C10) alkyl group, especially a branched (C4 to C10) alkyl group, and R' is a hydrogen atom or a methyl group. Said products are especially suitable for fixing a hairstyle. Said combination of active ingredients provides the hairstyle with an excellent, flexible and long-lasting hold.
