Abstract (en)

[origin: WO2011047863A2] The invention relates to a vehicle comprising a liquid container, a filling body made of an expanded material and a holding device for a filling body in the liquid container. The invention further relates to the use of an expanded material for a liquid container of a transport vehicle. The filling body is provided essentially with a casing. The vehicle is in particular characterized by an explosion and fire protection and furthermore by a reduced surge effect.
