Abstract (en)
[origin: WO2011049474A1] New imatinib acid addition salts are represented by general formula (I), wherein R represents O-acyl group of L- or D-tartaric acid, n represents any number in the range from 1 to 2, and their solvates and hydrates. Salts are preferably selected from a group comprising imatinib salts of dibenzoyl-L-tartaric, dibenzoyl-D- tartaric, di-p-anizoyl-L-tartaric, di-p-anizoyl-D-tartaric, di-p-tolyl-L- tartaric, dipivaloyl-L-tartaric or diacetyl-L-tartaric acids, which may be used in the treatment and/ or prevention of diseases mediated by tyrosine kinases.
