Abstract (en)  
[origin: WO2011048260A1] The invention relates to a busbar construction (6) between the first and second electrolysis tanks (A, B) intended for the electrolytic recovery of metals, the busbar construction (6) being placed on top of the side wall (5) between the first and second electrolysis tanks (A, B), the first and second electrolysis tanks (A, B) containing electrodes, such as anodes (1) and/or cathodes (2), the electrodes having a first bracket member (3a, 4a) and a second bracket member (3b, 4b), the electrodes being supported to the busbar construction (6) by means of the first and second bracket members (3a, 3b, 4a, 4b), the busbar construction (6) including a main busbar (8) and a first support member (9) and a second support member (10).
