Abstract (en)

[origin: WO2011047650A1] The invention relates to a handle device (10) for a closing device (12) for a displaceable door (11) or similar on a vehicle, comprising a first module (30) which comprises a handle support (31) and which is arranged on the inner side (11.4) of the door (11) by means of the handle support (31), and a second module (50) which is arranged on the outer side (11.5) of the door (11), and contains a handle part (51). Said handle part (51) is displaceably mounted in relation to the door (11) for operating said handle device (10). According to the invention, the second module (50) comprises a handle shell (54) which is arranged on the outer side (11.5) of the door (11), and said handle part (51) is displaceably mounted on said handle shell (54). The invention also relates to a method for mounting a handle device (10) which is used to operate a closing device (12) of a vehicle.
