Abstract (en)

[origin: WO2011048007A2] The present invention relates to a method for evaluating biomarkers. The invention in particular relates to a method for providing at least one pattern for at least one pre-defined effector having at least one effect that can be determined on a biological system, to a method for providing an effector class for a pre-defined effect or group of effects, to a method for identifying at least one effect of a pre-defined effector and to a computer program and a computer set up for performing said method.
