Abstract (en)
[origin: WO2011048218A1] The invention relates to a radio control, in particular for a work machine, comprising a remote control unit (10), which has a radio module (20.9) and which is associated with a keyboard (44). In order to be able to adapt such a radio control in a simple manner to different work machines with low effort, according to the invention the keyboard is part of a keyboard unit (40) that can be replaceably connected to the remote control unit.
