Abstract (en)

[origin: WO2011047999A1] The invention relates to an electric energy store (1), comprising a housing (2), a positive pole (3) and a negative pole (4), and a deep discharge device (6) integrated in the housing (2), said device comprising a discharge load (7) and being designed such that the two poles (3, 4) can be electrically connected by means of the discharge load (7). The aim of the invention is to enable targeted and controlled deep discharging of the energy store and to improve the operating reliability.
