Abstract (en)
The invention provides a slat-wall panel assembly comprising a plurality of vertically stacked slat-wall panels supported by at least one support member configured to support said plurality of vertically stacked slat-wall panels in a spaced relationship, wherein at least one slat-wall panel is removable from said slat-wall panel assembly, further wherein a gap is provided between each one of the plurality of vertically stacked slat-wall panels and adjacent ones of the plurality of vertically stacked slat-wall panels, and wherein the gap is closable. The invention also provides: a slat-wall panel for use in the slat-wall panel assembly; a merchandise display comprising the slat-wall panel assembly and at least one merchandise hanger mounted on the slat-wall panel assembly; a method of assembling the slat-wall panel assembly; and a method of removing at least one slat-wall panel from the slat-wall panel assembly.
