Abstract (en)
[origin: EP2492015A1] The sample container (1) comprises an access opening (7), which is stretched by a sample drill (5), and a cover (10), which closes the access opening in a reversibly fluid tight manner. A flexible plastic bag (2) is provided, which is fixed at the inner opening spaced from access opening of the sample drill by a carrier (4) in a fluid tight manner. Independent claims are also included for the following: (1) a system for analyzing a sample container; and (2) a method for analyzing a sample container.
