Abstract (en)

[origin: EP2492218A1] The container (10) has a housing (11) and an articulated cover (12) for closing the housing. The housing comprises two side walls (11a, 11b) connected by a transverse rail (13) and a cover support (15) secured with the cover. The cover support is fitted into the housing and pivotable between raised and lowered positions. The cover support defines a waste outlet in the housing in the raised position, and pushes waste toward a waste receiving bin in the lowered position.
