Abstract (en)

[origin: EP2492383A1] A knitted fabric is designed in which knitting widths of a part for a front knitted fabric and a part for a rear knitted fabric become different from each other by stitch shift from a point during knitting. Display in which pattern data has been applied to the shape of a part and display in which the shape of a part has been modified according to stitch shift and pattern data has been applied thereto can be freely switched. The area where a pattern can be designed can be clearly displayed.
