Abstract (en)

[origin: EP2492387A1] The flushing device (1) includes a drawer (3), a thrust arrangement (4), chambers (5) for storage of liquid and/or powdered detergents, and chamber openings directed towards the nozzles (6). The drawer is arranged below the thrust arrangement. The wall of drawer is extended with respect to the shaft (15) and is merged directly into the base region for conducting water directly into the base region.
