Abstract (en)

[origin: EP2492429A2] The plastering strip (2) comprises a base area (4), which is fastened to a component of the plastering strip, and a front area (16), which is determined for embedding in the plaster layer or for fixed connection with the thermal insulation. A guide link formed as an extension unit (12) is provided, which is connected with the base area and on the front area in a direction. An independent claim is also included for a building corner comprises a plastering strip.
