Abstract (en)
[origin: WO2011054410A2] A track maintenance vehicle (1) comprises two side walls (10) which can be spaced apart from one another by drive units (12) in a transverse direction extending normal to the longitudinal direction of the vehicle. The side walls delimit a working space (13) that is open in the direction of the track and is used for doing maintenance work. Each side wall (10) is composed of an upper wall section (19) and a lower wall section (20) in relation to a vertical direction. The lower wall section (20) can be vertically adjusted relative to the upper wall section (19) by means of a drive unit.
