Abstract (en)

[origin: WO2011051581A1] The invention relates to a rail (4) for a stretched false wall made of a flexible fabric (2), said rail (4) being attached to the wall (5) and/or to the ceiling (3) of an indoor space and moreover including an outer flange (6), a flexible inner flange (7), and a core (8) extending from the outer flange (6) and connecting the latter to the inner flange (7), said outer flange (6) comprising a closing member (10), said inner flange (7) comprising a movable portion (11) provided, on the free end thereof, with a jaw (12) that is provided so as to engage with the closing member (10) of the outer flange (6), said rail (4) being characterized in that it is attached onto the wall (5) or ceiling (3) with a clearance and in that the closing member (10) and the movable portion (11) together form a groove making it possible to guide the fitting tool for mounting the flexible fabric (2).
