Abstract (en)

[origin: WO2011050809A1] Method of creating a three dimensional presentation presented in a flat shape, from a two dimensional presentation, comprising the following steps: -acquiring a presentation in the shape of a drawing, picture or the like, where the presentation has an extend in a first plane defining X and Y axis; -digitizing the presentation; -digitally isolating different items in the presentation; -digitally defining a plurality of areas of each item; -digitally arranging each area in separate planes parallel to the first plane, but at different depths along a Z axis, said Z axis being orthogonal to said first plane; -optionally adjusting the color of each area; -printing or reproducing the multi-plane presentation; -arranging a transparent layer onto the printed presentation, or printing the presentation directly onto a transparent layer, where said transparent layer comprises a plurality of lenticular lenses.
