Abstract (en)  
[origin: EP2494886A1] The mount (10) has a detent fitting (42) attached at a vertical distance to a hinge fitting (38) at a door (16), which is held at an extensible carrier (12) by the detent fitting and the hinge fitting. The door is suspended at the carrier by the hinge fitting, which is pivoted around a horizontal axle. Holders (46, 48) are detachably latched at the carrier by pivoting the door around the axle. An interlock (90) locks the detent fitting at the holders. A positioning device adjusts a vertical position of the detent fitting relative to the carrier.
