Abstract (en)  
The element (1) has two longitudinal strips (3', 3'', 3''') whose arrangement runs parallel to each other. The longitudinal strips are extended in a longitudinal direction (X) and in a transverse cross-direction (Y). Multiple dollies (2) are positioned one behind the other in an X-direction and/or side by side in a Y-direction on the arrangement. An introduction channel (6) is provided above the arrangement, and extends between bases (7) of the dollies in the X-direction. The introduction channel accommodates a skid or a bracket of a lifting element.

Abstract (de)  
Transportelement (1) zur Aufnahme beweglicher Güter, bei dem ein oder mehrere Dollies (2) nebeneinander oder/und hintereinander auf dem Transportelement angeordnet werden können, und wobei das Transportelement über unterhalb der Dollies angeordnete Einfahrkanäle (6) mit geeignetem Hubelement anhebbar ist, während die einzelnen Dollies über quer zu den Einfahrkanälen verlaufende Ausnehmungen (8) oberhalb des Transportelements separat vom Transportelement abhebbar sind.
