Abstract (en)

[origin: EP2495195A2] The invention relates to an arrangement in the handling of web rolls, particularly in the handling of partial web rolls (10) in connection with slitter-winders of fibre-web machines, such as paper and board machines, for attaching a tail of the web roll (10). The arrangement comprises a transfer surface (20) which is inclined descending from the slitter-winder towards a plane of the floor level of the machine hall, a receiving beam (21) into connection with which are arranged tail-attaching means (24).
