Abstract (en)

The device has a continuous rollable intercalary mat comprising a needle felt support layer formed from synthetic fibers e.g. polyester fibers, where thickness of the mat is 2 mm. The support layer has faces coated with anti-slip blocking resin e.g. acrylic resin, that does not contain volatile organic compounds. The support layer is coated with pastured blocking resin on its one face provided in contact with a floor, and with adhered blocking resin on its another face provided in contact with covering elements. One of the faces of the support layer is covered with a removable protection film.

Abstract (fr)

Dispositif de fixation amovible sur un sol d'éléments de revêtement tels que des dalles ou des lés de moquette caractérisé en ce qu' il est constitué par un tapis intercalaire continu composé d'une nappe support de feutre aiguilleté à base de fibres synthétiques, en particulier de fibres en polyester dont les deux faces sont respectivement enduites d'une résine de blocage antiglissante exempte de composés organiques volatils, en particulier d'une résine acrylique.
