Abstract (en)

[origin: EP2495505A2] The apparatus (1) has cover (8) for closing the air inlet (7). An electrical operating element (13) is provided in actuator device (12) for operating the cover between open and closed positions. A fixing device (14) separately fixes the cover in open position without maintenance of electrical energization of the actuator device to electrical operating element. An independent claim is included for method for actuating cover of air inlet.
