Abstract (en)
[origin: WO2011051989A1] The present invention refers to a protective helmet (100), preferably for use in cycling, motorcycle riding or automobile driving. Such a helmet comprises a cap (1) and a chin strap (2) to secure said cap (1) to the head of a user. The helmet comprises winding means (3) fixed to a first side portion (11) of the cap (1). Such winding means are suitable for winding/unwinding the strap (2) to adjust its length. Moreover, the helmet comprises reversible fixing means (4) of a free end (22) of the strap to a second side portion (12) of the cap opposite to said first side portion (11). The helmet is characterised in that each of said winding means (3) and said reversible fixing means (4) comprises at least one manual actuation portion (30, 40; 30', 40') arranged outside of the cap (1).
